Monforts Model VTG5400 Natural Gas Fired Pre-Dryer, 84" wide, year 1996, with five sections mounted in a main panel

Scope of Supply:

For each section:

- (1) Bent stretching roller (Mycock) with guide roller and bearings
- (1) Vertical radiation field for the fabric surface
- (1) Vertical radiation field for the reverse fabric side

Each radiation field comprising:

- (1) Frame made of profile iron for the arrangement of three (3) radiator sets with infrared-radiation burners, (infinite regulation between 100 and 20% including mixed gas/air feed, with direct ignition and UV flame supervision, installed ready for connection.
- Device for the automatic swivelling-off and switching-off of the radiator sets in case of fabric stoppages as well as automatic reswitching when restarting the cloth transport.
- (1) Exhaust channel with pneumatically controlled throttle flap which automatically fully opens in case of cloth stoppage and returns again to the original operation position on restart of the fabric transport.
- (3) Radial suction fans with A.C. motor [for the five (5) predryers]. The fan is supplied separately.
- (1) Central gas feeding line, completely wired and with complete piping, with the necessary regulating and safety elements including regulating valve for the output range of the radiators. The gas must be available at the machine in gaseous condition with a regulated gas pressure of 80 mbar at the machine.
- (1) Combustion air fan with A.C. motor.
- (1) Photo-electrical cell for switching-off the radiators on passage of a fabric end.
- (1) Traction roller for each predryer, with jacket of stainless steel, 5.5 inch = 140 mm diameter, complete with bearings, with polished surface, arranged at the corresponding predryer outlet.
- (1) Compensator roller pneumatically controlled. Guiding rollers of the compensator with jacket made of stainless steel, with polished surface, arranged behind the driven traction roller of the last predryer.

The delivery scope does not include:

- the exhaust air lines from the predryer to the suction fan and from this fan into the open air
- the electrical lines for current for power
- drive system
