#### MACHINE FOR COTTON BALLS "REDPEAKELECTRONICS AND MACHINERY

YEAR OF MANUFACTURING: 2007

Model: HFMQ

CAPACITY: 240 Min. 4 linhas 4x60 bolas.

---

It has automatic counting and automatically switches the output to form another bag. It's all controlled by a PLC and a stepper motor that ensures a uniform supply of the corrections and adjustments to the weight. It also stretches combing the wick, for example 5/g/m SLIVER cut 5 cm, combing stretches up to 9-10 cm. thus it is possible to produce a ball more good and bulky.

As shown has several troughs forming balls to make the different sizes. You can go to the address below for the catalog.

[www.gauze-machinery.com](http://www.gauze-machinery.com)

It was just to add that the machine has a range of balls production from 240 to 800 balls / min depending on the size of them.

## ZIG-ZAG MACHINE

The machine is made in Germany.

We did not find the plate with the year of manufacture. However we can state the following:

Produces bags in a zig-zag from 20 to 1000 gr.

Production Capacity: more than 12 bags of 100 gr / per minute depending on the feeding.

Maximum input speed is approximately 25 meters / minute.

The machine has been altered to improve its effectiveness for example;

The timing for the formation of each package was through a variable speed motor mechanic and now is with an electronic inverter. The speed of the crankshaft which makes the swab in a zig-zag was done with a belt-fed motor drive. The drive pulley was replaced by an electronic variable speed drive that drives the engine.

Complete line for production of needed non-wovens, needed weighing from 80 to 300 gsm, finished width 3300 mm.

Comprising:

- No. 3 hopper loaders with bale opener link
- 1 loading silos with opener
- Condensers, pipes, switches, fans for the launch of reciprocal link these machines and execution cycles work anticipated
- 1 group of dust-collecting
- 1 charger carding machine with volumetric dosing
- 1 FOR carding working width 2500, of pre-opening
- 1 intermediate crossings
- 1 FOR carding working width 2500, of finishing
- 1 Tomes lapper width of the final work: 2500 entry, exit 3800
- 1 drawing frame with four pairs of smooth cylinders 2
- 1 Asselin pre-needle loom working width 3300

- 1 Asselin needle loom working width 3300
- 1 Asselin needle loom working width 3300
- 1 group of cutting transverse / longitudinal winding
- No. 1 electrical power and control

All equipped with guards and security guards, mechanical and electromechanical systems Year of construction 2003 - 2005

Estimated current value of € 289,000 plant-FOT

Replacement value in 2010: € .1.800.000,00 - replacement value in 2004: € .2.500.000,00 -

complete line for production of nonwovens High loft, weight of 500 to 4500 gr / sqm and over height mm 3000

Comprising:

- No. 3 loaders bale opener
- 1 opener
- 1 carding willow
- 1 box cutter wall milling
- Condensers, pipes, switches, fans for the launch of reciprocal link these machines and execution of work processes under
- 1 group of dust-collecting
- 1 charger carding machine with dispenser mechanical balance
- 1 BONINO cards working width 3500 Mm of pre-opening and finishing a double-drum
- 1 Tomes cross-lapper final entry width exit Working 3500 working width 3300
- 1 floor apron
- 1 Tomes oven air-bonding single-pass, double mat and calibrator unit Cooling output
- 1 heat generator for the oven with a potential 550,000 natural gas burner Kcal / h and delivery pipes and circulating hot air oven air bonding
- 1 group motion, swiveling rotary blade for cross cutting of materials high density
- 1 group of cutting transverse / longitudinal and winding
- 1 roller carpet with the load cell and PC interface with printer for weighing and labeling of the finished product
- 1 electrical power and control

All equipped with guards and security guards, and mechanical compliance with existing legislation Year of construction 1996 - 1998

Estimated current value of € 289,000 plant-FOT

Replacement value in 2010: €1,400,000-replacement value in 1997: €1,800,000
