SPINNING LINES DESCRIPTION (year of construction 1997)

A Line (4 sections) production 3.000 kg/day final count 150 den white or coloured
Composition of each autonomous section:

molecular sieve dehumidicator with closed circuit for the process'air
crystallizer/dryer for 40 kg/h for chips base
crystallizer/dryer for 5 kg/h for coloured master with automatic granules' loading
volumetric dosing system for master batch
extruder diam. 45 mm
spinning head with a crown pump and 6 parcels of rectangular spinnerets
dowtherm heating system
blow cell with enzyming and entangling threadlines
winder with six compresses

each section can produce independently from the others a different count and colour.

B Line production 1.000 kg/day final count 150 den white or coloured

The line can serve as a production plant, such as the pilot plant, as it allows to work PET PP using godet, revolver-type winder, dowtherm heating system with and without vacuum.

Composition:

molecular sieve dehumidicator with closed circuit for the process'air (temperature up to -70°C.)
crystallizer/dryer for 40 kg/h for chips base
crystallizer/dryer for 5 kg/h for coloured master with automatic granules' loading
volumetric dosing system for master batch
extruder diam. 45 mm
spinning head with two crown pumps and 8 parcels of round spinnerets with rapid clutch
dowtherm heating system
blow cell with enzyming and entangling threadlines
winder with three hot godets and eight compresses

each section can produce independently from the others a different count and colour.

C and D Lines production 2.000 kg/day each one with final count 150 den white or coloured

The two lines have in common the air-treatment for chips drying (Munter lithium chloride dehumidicator with open circuit)

Composition of each line:

crystallizer/dryer for 100 kg/h for chips base
crystallizer/dryer for 8 kg/h for coloured master with automatic granules' loading
volumetric dosing system for master batch
extruder diam. 75 mm
spinning head with eight polymer dosing pumps and 8 parcels of double rectangular spinnerets
dowtherm heating system
eight blowing cells with enzyming and entangling threadlines
four winders with four compressors

R Line (4 sections) production 150 kg/hour

The line is used for the recovering of the wastes in various steps of working.

Composition :

- grinding mill
- small heap silo
- volumetric dosing system
- pre-heater
- extruder diam 75mm
- spinning pump and head with spinneret for chips
- quenching tank, drying
- cutting
- transporting device to silo

Each line is commanded by means of an independent console which visualizes all the parameters like temperature, pression, etc, at the same time the winders have a semiautomatic robots for taking-off.

Spinning ancillary equipment

Stocking and pneumatic transporting system for master and chips (three cement silo covered by inox steel inside,

compressors, automatic valves and so on).

Winding and blowing air conditioning, composed of a preparation station, filtration, washing and humidification with separate humidity and temperature regulation for zone and line (refrigerated water batteries, hot water batteries and electrical resistances), with relative regains.

Chiller for refrigerated water with two custom pack closed-circuit refrigerators temp. 4/5°C which serve the dryers' process air dehumidifiers, into the chips-feeding tubes towards the dryers, in the conditioning for the air humidity and in the compressors.

A centralized compressed-air plant with two screw-compressors of 10 bar and a suitable stocking, dehumidifying and deoiling systems with a relative control system.

Diathermic oil plant with two gas generators temp. up to 250°

Hot water (90°) gas heated plant for the conditioning and heating.

Transformation cabin MT/BT 1200Kw and a suitable network. Buffer battery for the spinning lines with a guaranteed working time of 10 min.

Power-boards room for the spinning lines

Spinnerets' laboratory for cleaning and preparation of spinnerets parcels with burning oven, sander and pre-heating oven.

Chemical textile laboratory for the complete yarn checking.

Enzyming oil preparation system with a demineralizer and plastic reinforced by fiber glass tanks.

Gas ramp for the azote distribution on the extruders chips' entry bodies.

Quality control and POY packing zone.

Complete POY Spinning with texturizing and dyeing producing PET (75dn to 150dn) and Nylon (40dn to 100dn)

SPINNING ROOM for production of standard and bulk acrylic yarn as well as wool similar yarns as below:

1. SAINT ANDREA NOVARA - MST stretch breaking converter with steaming device - MST-9 - 1 pc - year 1990

In addition:

Perforated pots - 50 pcs
New and used drums

2. SAINT ANDREA NOVARA drawing frames:

RSDN - 1 pc
DSN - 2 pcs
SH-24 - 1 pc

rebraker - one pot on output
I st process - one pot on output
II nd process - double pots on output
III rd process - double pots on output

computer control with waver

YEAR: 1998

In addition:

Pots - approx. 150 pcs.

3. SCHLUMBERGER GN4 ball winding machine - 1 pc - year 1980.
4. TEXTIMA drawing frame (3 operations) - set - 3 pcs - year 1990.
5. TEXTIMA roving frame - 2 pc - year 1987
6. BEFAMA PH - 12 ring spinning machines - 5 pcs - /408 spindles/ - year 1990
BEFAMA PH - 2 ring spinning machines - 4 pcs - / 408 spindles/ - year 1975
In addition:
Spinning cones - approx. 30 000 pcs.
7. SAVIO automatic winder for cross cones - 2 pcs
with USTER cleaners - 54 and 48 points - year 1990

8. SAVIO automatic winder for soleil (cones) - 2 pcs
with LEPPFE cleaners - 56 points each - year 1990

+ Cones for winder which are feeding ELITEX doubling and twisting machine

9. ELITEX drum doubling and twisting machine - 4 pcs - 1990
- 3 winders 120 points
- 1 winder 96 points

In addition:

1 twisting machines for spare parts

10. SUPERBA shrinking machine with the winders (10 points) - 2 sets year 1990

11. Automatic and pressure steamer for yarn stabilisation - 1 pc

In addition:

New vacuum pump

12. SCHLUMBERGER BM-11 roving frame - 1 pc - 1990 year

In addition:

Different spare parts for full line.

All above machines are running in production cycle for standart and bulk acrylic yarn as well as wool similar yarn so the best is to sell them in 1 lot.

Very good running condition

maximum 30 spindles possible, but only average 27 heads per machine available

take-up traverse 6", 4°20' or 5°57'

USTER Quantum yarn clearer

Microprocessor Type MMC-III

Jacobi overhead cleaner

Waxing

2 machines incompletes!!

6 RIETER ring spinning machines
type G 5/1-D
624 spindles each
ring diameter 40 mm
gauge 75 mm
tube length 220 mm
Jacobi overhead cleaner
automatic tube feed

Semi-linked with:

- 2 MURATA winders
 - type Mach 7Vss
 - central vibrator magazine
 - 40 spindles each
 - take-up traverse 6", conicity 4°20'
 - LOEPFE TK 930 F yarn clearer
 - Jacobi overhead cleaner
 - waxing

Fully automatic yarn steaming and packing department:

- 1 POZZI vacuum steamer with automatic feed of 3 cone palettes and automatic programming of vacuum steamer, automatic doffing of 3 palettes and transport to intermediate storage, model BR-A-Q-3P, height 220cm, temperature 96°C

automatic feed to:

- 1 GUALCHIERANI transport and palletizing system for foil wrapping of palettes with INCAS warehousing control system
 - capacity 6 pallets/hour

Accessories

- 1 BERKOL Grinder, model RF
- 1 BERKOL Berkolizer
- 1 MANNHART stripper
- 1 ROBOPAC packing machines
- 2 LINDE fork lifters
- 1 Autefa bale press
- Cans and tubes for the machines

All manuals available in the plant

All tools and gauges available in the plant

Spinning

Spunbonded spinning plant h. 4800 mm

Manufacturer of spinning plant: VAREMAC

YEAR : 1992

Maximun capacity of Extruder 600 kg./h

Speed range: min 20 max 100 mtl.

estimate electricity consumption: 600 kwh / 650 kwh

Installed power 750 Kwh about

Height: spinning max 4800 mm. product 4300 mm. max

Filaments count : 3,5-4,8 dtex (kg/h 400-500)

Spinnerets : 288 ends each :2= 144 ends each jet

Composition:

- N° 1 Extruder RV 160/33 D
- N° 1 Filter 2 way maual exchange
- N° 4 Gravimetic dosing system (manufacturer Piovan) with vacuum pump
- N° 1 Piping for polymer extrusion
- N° 1 Spinning Beam RV-SB 96/200
- N° 96 Spinning pack (48 installed and 48 stand by)
- N° 2 Spinning pump driving unit
- N° 1 Quencing air treatment
- N° 2 Drawing and distribution units
- N° 1 Drawing and distribution unit
- N° 1 Structure
- N° 1 Control pannels

LEMA - Ring Twisting Machine with 72 Spindles – Yoc - 1985

LEMA Lazzeni Mario - Ring Twisting Machine

The big advantage of ring twisting system is the delivery unit. This delivery unit is a godet drive with gear driven rollers, suitable for doubling and twisting every kind of textile filaments and spun yarns.

This delivery system is also capable to twist different counts together with the guarantee of an equal length of each component within the twist construction.

The delivery system with friction driven rollers is suitable for doubling and twisting with high yarn supply speed and twist.

The machine is with 72 spindles Yoc - 1985
